IMCOPIPES FZ-LLC WORK EXECUTION POLICY

Imcopipes utilizes the services of strategically placed in-country Buyers who, in conjunction with Imcopipes employees, are responsible for the management of the delivery of the goods, throughout the whole project life-cycle.

These quality and schedule experts are part of Imcopipes overall program for quality and compliance but with responsibility to interact and work directly with suppliers during the acquisition cycle. Our in-country Buyers reinforces Imcopipes proactive approach to resolve potential issues and help suppliers deliver consistent value, in a timely manner.

Our Buyers are engaged in a host of activities, all of which involve monitoring the processes of Imcopipes suppliers in order to receive the properly “built to spec” materials and equipment on time. Sound knowledge of industry codes and standards is required to identify nonconforming quality and manufacturing issues before they have a chance to impact a project. Our Buyers activities include pre-award survey/audit assessment, source surveillance, and post award survey/audit assessment in prime supplier facilities. These activities are planned and executed on Imcopipes projects for the purpose of determining supplier capabilities, identifying nonconforming materials/equipment prior to shipment, and verifying the effective implementation of Supplier Quality Assurance programs.

Our Buyers expediting activities include visiting prime supplier and sub-supplier shops to obtain shop schedules, expedite work progress, anticipate and assist in the identification and resolution of potential and actual problems, and report back progress and issues to our projects. Typical services that our Buyer provide are:

- Schedule management
- Engineering drawing and documentation status
- Material receipt
- Fabrication progress
- Preparation for shipment
- Developing solutions to resolve production bottlenecking
